## WORK EXPERIENCE (3+ Years)

---

### Vistec Technologies

July. 2023 – Present

*Full Stack Developer & Software Engineer*

*Addis Ababa, Hybrid*

- As a software engineer, I was solely responsible for creating web applications from client requirement analysis to their deployment and maintenance.
  - **Key Results:** Self initiated implementation of extensive monitoring and alerting powered by prometheus, grafana and alert manager. Providing the first-ever observability to our servers.
  - Developed **6** full stack projects first hand (Node.js, Express.js, PostgreSQL, Vue.js). Enabling the company to work on concurrent projects as a startup.
- Created a robust boilerplate configuration for our front end stack to upgrade from Vue.js 2 to (Vue.js3, Vite, i18n, Pinia) and its ecosystem. Resulting in staying up to date and keeping best practices.

### Minab IT Solutions PLC

Apr 2021 – June 2023

*Lead Software Development Engineer*

*Addis Ababa, Onsite*

- Led the back end development of enterprise recruitment and vacancy management products (Hasura, NATS message broker, Golang, PostgreSQL) in a cross functional team of 7.
- Executed database (PostgreSQL) migrations from DigitalOcean to AWS for our server infrastructure.
- Integrating a third party (Golang) authentication API and adopting the service with the company needs.
- Mentored over a (dozen) junior developers and interns. Guided them in navigating the industry, drawing on my own experience of advancing from intern to lead developer in under 2 years at the same company.

*Full Stack Developer* | Nov 2021 – June 2022

- Built a survey application for one of our clients. Utilized ELK Stack (Elastic search, Logstash, Kibana) for data visualization and analysis.
- Played a crucial role in 4 deployments of a digital system that streamlined the process of sending qualified citizens abroad through legal verification of recruiting agencies.

*Software Engineering Intern* | Apr 2021 – Oct 2021

- Converted 56 screens from AdobeXD to user interface life for a ministry of labor and skills project
- Built 14 internal vue3 component libraries when related frameworks were in their alpha phase which are in use currently.

## EDUCATION

---

**Addis Ababa Science and Technology University Name**

Sep 2017 - Sep 2021

*Degree (Bachelor of Science), Major (Software Engineering)*

*Addis Ababa, Ethiopia*

- Balanced scorecard system (Loopback, MongoDB) for the university,
- **Relevant Coursework:** Data structure and algorithms; Programming I and II; Requirement analysis; Object oriented programming; Compiler design; Computer architecture; System analysis and modeling.
